

Preschool Science: Explore! Discover! Investigate!

Hands-on Science Workshops

Participate in a training that is designed to guide preschool teachers and childcare providers in implementing science curricular activities and learning into the preschool program.

You don't have to have a degree in biology or chemistry to help young children learn about science. These workshops will guide you in helping children learn about science as they explore and discover and have fun!

Workshops can also be customized and presented at your site!

Call us for details!

Workshop Schedule:

Becoming a Scientist

January 30, 2010

What is science? What does a Scientist do? These questions and more will be answered as participants engage in hands-on activities that focus on providing teachers with strategies and activities to help students observe, ask questions and experiment.

I Dig Dirt!

Exploring the Earth Beneath our Feet

February 27, 2010

What is dirt? What is soil? Are they the same? Investigate these questions and more as you learn about the earth beneath our feet! Activities include discovering what can live in soil and constructing a habitat.

Science Learning Through Play

March 27, 2010

Balls, cars, things that go! Children learn most when they are engaged in play. Explore the concept of "play" as you make and play with toys that can teach science and math concepts.

Workshop Location: California Science Center
700 Exposition Park Drive LA CA 90037

Workshop Time: 9:00 a.m.- 1:00 p.m.

Registration Fee: \$35.00 per workshop

Registration fee includes continental breakfast, parking and materials and a Certificate of Participation

Enrollment is limited! Register early to reserve your space!
